

NACC CYBERSECURITY ANALYST PROGRAM 2024

COURSE OUTLINE

The course consists of 8 subjects.

- IT Foundations
- Network Administration
- Linux Fundamentals
- Cybersecurity Concepts I
- Cloud Environments
- Cybersecurity Concepts II
- Cybersecurity Concepts III
- IT Project Management

Total Number of Hours:

484 Hrs. Theory + 516 Hrs. Practical
= 1000 Total Hrs.

PROGRAM SUMMARY

The NACC Cybersecurity Analyst Program equips learners with the practical skills and industry-recognized certifications needed to start a career in cybersecurity. The program offers hands-on training in network security, threat detection, ethical hacking, and IT infrastructure. It prepares students for key roles across sectors such as finance, healthcare, technology, and more.

CAREER OPPORTUNITIES

Graduates can pursue opportunities ranging from Help Desk Technician and Junior Systems Administrator to roles in network and systems administration. Certification pathways such as CompTIA A+, Network+, Linux+, Security+, CySA+, PenTest+, Cloud+, and Project+ prepare students for positions including Security Engineer, Threat Analyst, Penetration Tester, Cloud Administrator, IT Auditor, and Project Coordinator. These skills support careers across a wide range of industries that rely on secure and resilient IT environments.
